## SPRING PLANT GUIDE

PLANT:

**VEG: EGG PLANT: ICHIBAN(LONG SLIM**

WIDTH 15-20 inches

HEIGHT 15 inches

TYPE VEGETABLE

COLORS AVAILABLE: n/a

### General Growing Requirments

When planted in the ground full sun

Soil Moisture average

Type of Soil good top soil

Plant Food No

Growing Habit mounding

SPACING: 15 inches

COMMON PESTS OR PROBLEMS normal garden insects

### SPECIAL CONSIDERATIONS

- Deer resistance     Attracts Butterflies + Hummingbirds  
 Drought tolerant

#### We grow this plant in

- market pack  
 3.5 inch Pots  
 4 inch pots  
 6-8 inch pot  
 10-12" Hanging Baskets  
 Combination Containers

#### Recommended uses for this Plant

- Plant in ground     Plant in window box  
 plant in large container  
 Plant in Hanging Baskets

### GROWER'S COMMENTS AND GENERAL INFORMATION

VEG: EGG PLANT: ICHIBAN

61 days. Solanum melongena. (F1) Plant produces heavy yields of high quality 9" long by 1 ½" wide dark purple eggplants. It is so dark purple that the eggplants are almost black in color. Very flavorful and tender. Excellent for Oriental dishes. Also great for grilling and roasting. Performs well even at cooler temperatures. Excellent for home gardens and market growers. A variety from Asia...
